

## THE WORLD OVER

### ROOSEVELT CALLED A DICTATOR

### BRITISH COLUMBIA HEAVY DEBT

### WANT FARM DEBTS CANCELED

### RUSSIA AND U.S. CLOSE BREACH

EDINBURGH, Scotland.—Stanley Baldwin, last president of the council, declared that "the strongest of all experiments being tried in the world" is the granting by the United States to President Roosevelt of "powers as great as any dictator, whether he be seated in Berlin, Rome or Moscow."

"I do not know, many Americans do not know what they are aiming at," he maintained, "but there is a hope of dictatorial action altering the course of human events and bringing prosperity for which people have no patience to wait."

"I do not believe there is any man who is good enough and knows enough to exercise dictatorial powers over a free people. Our people were not made for dictation. At all costs such attempts in this country must be defeated."

VICTORIA.—Seventeen million dollars is required by the British Columbia government to pay treasury bills and deficits outstanding at the present time. Hon. John Hart, Minister of Finance, declared on Monday, He was addressing a political rally here, attended by the new Liberal government. Mr. Hart is a candidate in the deferred election for the legislation in Victoria.

The total gross debt of the province including deficits, was \$169,938,285. The sum of \$741,083 shown as borrowed for buildings, roads, bridges and other public expenditures, but not expended, was also not available in the treasury.

CHICAGO.—The farmers second national conference on Friday last adopted resolutions condemning the farm policies of the United States government and appealed to farmers to "fight the trusts, the bankers and the big monopolies." Speakers emphasized the convention's theme, "cancellation of all farm debts."

In a "call to action" adopted by vote the conference declared:

"1. Tax Sates, foreclosures and evictions have destroyed farm homes from one end of the country to the other and remain a constant threat to the heated farmer."

"2. Roosevelt was brought forward by Wall street to carry on its dictates after Hoover had aroused the wrath of the working people."

"3. The new deal was designed to help the financial interests at the ex-

### CARBON GETS MORE PUBLICITY

The Calgary Herald put out a special 17 page edition commemorating its British birthday last Saturday, and among the pages of remembrance was one devoted to various places of historic interest. Carbon is listed among the towns under the following caption: "Carbon—Derives its name from heavy coal deposits."

"The town of Carbon started with a garage and until 1906 was merely a little ranch settlement. A Justice of the Peace and two R.C.M.P. officers maintained law and order."

In 1905 Carbon school district was formed. At that time there was no province of Alberta and on April 23, 1906, a building was erected and bore the inscription "Carbon School District No. 1218 of the N.W.T." This is an error. The school did not bear the inscription, but the school seal did.

By 1914 the town was beginning to branch out and there were a number of business places but on the night of June 18 a disastrous fire swept the town and destroyed the entire business section.

While the fire caused serious loss it meant the rebuilding of more modern and better structures. In 1920 the railroad came through and advancement has since been steady.

Cement sidewalks have been constructed, a fire hall built with full equipment and better streets and roads maintained. With a population at present of about 450, there is an enrolment of 180 pupils at the school.

"Do you remember when a girl was proud of having a weak chin?"

"I ought to remember it; that was when I got stung."

pense of the lives and homes of the working masses."

"4. The crop destruction program of the AAA was intended to force impoverished farmers from the land, while the well-to-do farmers were to benefit."

"5. The refinancing program was intended to eventually sell out the small farmer."

Recognition of Soviet Russia by the United States has been announced by President Roosevelt.

William C. Bullitt, a state department expert on Russian affairs who has attended to personal conversations between Roosevelt and the Russian diplomat, has been chosen as the first United States ambassador to the Soviet Union.

An agreement also was reached for a "consular convention" between the two countries in which the United States is to be assured that its citizens will have all the rights that are granted to the nationals of other states under existing treaties with the Soviet. The right for political freedom for United States citizens in Russia will be given.

## Mr. Justice Ford Dismisses Balderson Nullity Action

### "THE EIGHTH DOOR"—A MYSTERY PLAY

Local dramatists will present a 3-act comedy-drama "The Eighth Door" in the Primrose Exchange hall, Carbon, on Friday evening, December 1st, at 8:15 p.m. The players have been practicing ardently for the past few weeks and now have the play well in hand and almost ready for presentation.

This play is being held under the auspices of the Carbon L.O.D.E. and is being directed by Mr. G. F. McEwen.

Remember the date—December 1st—and show your appreciation of local talent plays by being present. "Eighth Door" will have pleased some but they say this play will please you all.

Alberta News  
Alberta Turkeys in New Zealand

In far away New Zealand, the largest turkey farm in that country has been built up from foundation stock secured from turkey breeders in Alberta, according to information from provincial poultry department.

This New Zealand farm is owned and operated by a woman, Mrs. Katherine Bull, who purchased her breeding stock from Alberta some years ago. She forwards a photograph of her flock recently taken by the government of New Zealand and she has also placed a further order for breeding stock from the provincial government.

Butter Production Heavier

This year's bids for a new record production of creamery butter in Alberta. Already for the ten months of the present year an increase of 12 per cent has been recorded in the deliveries of butterfat to the creameries totalling 15,941,347 lbs. compared with 15,772,764 lbs. for the same period of last year. The province's previous record in creamery butter production was in 1931, when over 15,000,000 lbs. were manufactured. The total of this year will likely reach 25,000,000 lbs.

Alberta Oil Output Largest

Alberta is now shown to be the leading province of Canada in production of oil. In September Canadian wells produced 97,242 barrels, of which Alberta alone produced 56,358 barrels.

By Payment for Bacon  
Sugar beet growers of Southern Alberta recently received payments totalling upwards of \$400,000 net from the plant at Raymond for deliveries of beets this year.

Calgary Sheep Sale

The best sheep sale in 30 years was the record made this year by the annual sale held recently in Calgary. Incidentally the sheep industry is in a bright spot in the general agricultural situation. At Calgary sales 30,000 were sold in one day, averaging \$15.35. The top price was a sensation, \$62 for a Hampshire ram lamb from the R.P. ranch. A Suffolk from the C.P.R. farm at Tilly sold for \$51.

Successful Bacon Meetings

Farmers in general are showing a keen interest in the marketing of their produce held throughout this part of Alberta to promote the better bacon campaign inaugurated by the provincial department of agriculture in co-operation with the federal department the railways and the packers. The gatherings are being largely attended and the demand for information is such as to indicate a strong desire on the part of the farmers to do their part in raising the percentage of select bacon type hogs produced in Alberta. Stress is being laid on the point that it is not increase in numbers that is needed, but a greater proportion of high quality hogs which are suitable for the British market.

Husband—"Darling, what has happened? Why have you that plaster over your left eye?"

Wife—"Plaster? That's my new hat"

Wife—"I'm afraid the mountain climate would disagree with me."

Husband—"It wouldn't dare."

### Warm November Weather

Alberta has been experiencing a sort of second Indian Summer during the past week, with very high temperatures at many points. The snow which came in the latter part of October has almost entirely disappeared in many places, and reports come from southern Alberta that the cattle are once more on grass, and maximum temperatures reached as high as 60 degrees early in the week. However, such warm weather is not entirely unusual for Alberta, for the records for the past years show some very high November temperatures during that period, as well as some quite low ones, of course. At Edmonton, in four of the ten years the November maximum temperature was over 60 degrees, with a high record of 74 degrees in 1931. The average mean temperature for November in the ten years at Edmonton was 24 degrees. At Calgary the ten year record shows seven years in which the thermometer passed the 60 degree mark, during November with an average mean temperature for November during the ten years of 28 degrees.

At this meeting it was decided that such a club should be formed in town and necessary officers and committees were appointed to look after matters until the association should be definitely formed.

Wednesday, November 27th, was set for the organization meeting, which was to be held in the United Church, and the purpose of the proposed club was to foster skating and hockey in Carbon for the benefit of the citizens and their children.

This meeting was to have been held last night, but this newspaper went to press early Wednesday afternoon, so the report of the meeting has been deferred till our next issue.

## CURLING CLUB SETS BONSPIEL DATES IN JAN'Y

A general meeting of the Carbon Curling Club was held in the Municipal office on Friday evening, November 17th, with president L. Poxon occupying the chair.

S. P. Torrance was elected to fill a vacancy on the executive committee. The president reported that pipes had been laid underground from the well to the curling rink and that the pump house had been repaired.

Don Allen was hired as caretaker of the curling rink at \$15 per month.

A minstrel show was suggested as a means of raising funds to aid the club finances and Messrs. Greenman, McKibbin and L. Poxon were appointed a committee to look into the matter.

Proceeds came up for considerable dis-

cussion and were finally set at \$7.50 for the season, starting \$1.00.

A non-resident committee of S. P. Torrance, the president and the secretary, was appointed to canvass for members.

The Carbon bonspiel dates were set for January 16, 17, 18, 19th, and the secretary was instructed to notify all clubs of these dates.

A special prize committee was appointed as follows: Messrs. Greenman, Nash, Edwards and McKibbin.

Bonspiel management committee is to consist of three members, Messrs. Lashley, L. Poxon and Torrance.

# British Aviator Has Amazing Escape When Forced To Jump In Spinning Research Trials

Flight Lieut. C. S. Standish, test pilot and racing motor car driver, had an amazing escape from death when he was making special research spinning trials with a secret type of aeroplane near Colnbrook, Middlesex, recently. Spinning trials are part of the routine work in the testing of new British aeroplanes, and these trials are first done by the manufacturer and are repeated by the official test pilots of the air ministry's experimental stations.

Often considerable risks must be taken by these pilots when some novel feature is being tried out or, as in this instance, special research work is being done; but they develop special facilities for dealing with emergencies. It is doubtful if, in the whole history of flying, any test pilot has had such an anxious moment as Flight Lieut. Standish.

He was performing special research spinning trials at about 7,000 feet when a flat spin developed with high rate of rotation. For some time he endeavored to get the machine back without success. Finally he decided the time had come when he must jump with his parachute. The aeroplane was spinning to the right and he decided to jump over the left side of the machine in order to fall clear of the machine.

Owing to the direction and speed of rotation of the aeroplane, however, Flight Lieut. Standish was actually hurled back into the rear cockpit of the particular machine. Fortunately he had not begun to pull the ripcord of his parachute, so that the canopy was still in the pack. The rear cockpit of this particular machine was not so far from the front cockpit as the machine was spinning to the right and he decided to jump over the left side of the machine in order to fall clear of the machine.

Through all these experiences he remained perfectly cool and was able to guess the cause of his being thrown back into the machine. He reasoned he must jump this time over the other side and this he succeeded in doing. The machine still spinning flat and rapidly. He fell clear but wanted to ensure there was no risk of his parachute fouling the aeroplane. The aeroplane passed within a few feet of him as he fell, and he pulled the ripcord. Immediately afterwards he saw the machine only a few feet below him. While he had been pulling at cord the aeroplane must have passed behind him, falling at a higher speed than he had thought. He landed safely near Colnbrook and his aeroplane crashed in a gravelly gully about two miles away.

Flight Lieut. Standish is a pilot with a remarkable record. He has won many events, both on road and track, and recently during the Uster 1928 motor car race he set up a new class lap records in a six-cylinder car. In 1928 he was selected to be a member of the British Schneider trophy team. His skill at aerobatics is universally acknowledged.

**494**  
**A SMART DRESS FOR MATRONS**  
**DEBENTURE TO GIVE GRACIOUS TALK SILHOUETTE**  
For those who like a simple smart dress to start the season, here's your chance. It will meet all day occasions admirably as the original in black wool. Tucked into the becoming V-neckline is white lace that ends in a soft jabot tie. It has length-giving pleated skirt. Style No. 494 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

The small view shows short sleeves with corset fitting trim. This interesting cut is easily accomplished. The pattern covers only the bodice and skirt. Size 36 requires 3 1/2 yards 29-inch material with 5/8 yard 3 1/2-inch lace. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap only carefully.

**How To Order Patterns**  
Address: Winnipeg Newspaper Union, 315 McDermott Ave., Winnipeg  
Pattern No. .... Size .....

**Home Of Poe Restored**  
Philadelphia House of Edgar Allan Poe Now Public Shrine

Restored in every detail to the appearance of a century ago, the Philadelphia house of Edgar Allan Poe has been opened as a public shrine. It was here that he wrote the poem "The Raven," and many stories, including "The Gold Bug." Many original manuscripts, first editions and other valuable pieces from collections of Poe's works now are on display in the restored, three-story cottage. Included among the original articles are a stove, a desk and bedroom furniture. A bust of Pallas has been placed in the study in which Poe worked.

**A Great Responsibility**  
A tourist in Italy who was held on a charge of manslaughter arising out of an automobile accident in which a car he was driving collided with a truck killing a friend who was riding with him as a passenger. This provides another argument against the practice of giving a lift to motorists on the highway. Very few motorists rest on tax responsibilities they accept when they take their place behind the wheel of a car.

Mrs. Peck: "She's very pretty, but the rest says a man can't imagine why all the men speak so highly of her."  
H. Peck: "I can."

The 11 in New York City is cleanest and best loved town with dirt and dirt in December.

W. N. U. 2629

## Unnecessary Accidents

Mechanical Condition Of Many Cars Means To Safety

Justice Kelly, speaking in the supreme court at Whittier, Ontario, uttered a great truth when he stated that many automobile accidents were caused by people driving cars which had long since qualified for junk piles. His observations were made from his experience of court cases arising out of such accidents, and they will be supported by many who have been victims of accidents because of inferior, and sometimes uncontrollable cars, being driven on the highways.

This condition is, perhaps, more apparent at the present time than it has been in past years. Cars are being driven on the highways today which, in more prosperous years, would have long before been consigned to the scrap heap, unfit for further service. But that is no reason why human lives should be endangered. No car should be allowed to travel on the highway unless its mechanical condition is such as to keep well within control, to make a safe vehicle to drive.

Both pedestrians and motorists whose cars are in safe condition have a right to such protection, and if there is no law which can keep unsafe cars off the roads then it is time one was enacted.—Oshawa Times.

## Richest City In World

Johannesburg, South Africa, Enjoys Continues And Amazing Prosperity

The world's richest city today is not London or New York. It is Johannesburg.

This fact emerges from the comments that have followed a reference made by Samuel Storer, M.P., for Sunderland, on his return from South Africa, to the amazing prosperity of the city which is the centre of the Transvaal goldfields. At the peak of this year's boom on the Johannesburg Stock Exchange, gold mining shares rose to the fantastic total of three hundred million pounds. Not financiers and business men only, but miners, school teachers, and even laborers shared the golden opportunity of quickly rising prices, and, having successfully speculated, they proceeded to enjoy their good fortune by spending it. They take no thought for the morrow.

In Johannesburg the morrow has always been left to take care of itself. As evidence that it does so, anyone points to the progress of the city, which has been stupendous.

Under Three Flags Expedition  
Travelling from Canada to Mexico with many stops in Canada and the United States. Over a dozen make up the caravan (Albion). A streamlined car which takes the lead.

At left: Map of the trip. The expedition will travel from Pease River, Canada, through the United States to Vera Cruz, Mexico, thence south.

Small Boy Slightly Miled On Name Of Book

A little boy who applied for registration at the Canadian Club of Montreal, the Federated Charities of Montreal, evidently thought the Recording Angel must be a woman.

Finding the registration book missing, the lady who took his name asked the lad if he would run upstairs and get it from Miss Mackay. Up he scampered, and, knocking at the open door of the lady superintendent's sanctum, said: "Miss Mackay, please give me the—The Resurrection Book."

**Avoid Hunting Accidents**  
In deer hunting season in Missouri, a rugged Ozark hunter with a red hat and a well-dressed suit, was at least red-headed in a hat that isn't red—so he was the signal to other hunters that the hunter isn't a deer. Not a single fatality was reported last year and red hats and red feathers were given much of the credit.

Black diamonds, or carbon, are found mainly in Brazil in river stream washings and are the rarest and highest priced of all industrial diamonds.

More than half the money spent for amusement in Paris last year was for movie matinees.

## Safety In The Home

Commonsense Rules Given By Health Officer Of New York

New York's health commissioner has prepared a "home safety code for adults" containing a list of instructions. Some of these are:

Have every room and all stairs well lighted.

Keep floors clear of grease, toys, etc., and the stairs free of all obstructions.

Use a rubber bath mat in the bathroom.

Use a step-ladder when working above the door.

Use non-inflammable cleaning fluids.

Keep wet hands off electrical appliances.

Read the label before taking any medicine.

Use commonsense, do not rush, be careful.

These are all rules of elementary commonsense. But it is just by the simple neglect of ordinary precautions that accidents occur in homes.

## Have No "Unwritten Law"

British Countries Do Not Recognize It States Judge

Canada is told officially it has no "unwritten law," Judge Joseph Weir, a man in a London (Ont.) court for using a knife upon an offender against his wife. "In the United States," says the magistrate, "judges and juries recognize an unwritten law and hold that fathers and husbands may on occasion take the law into their own hands, but never in British countries."

The weakness of the unwritten law is shown in its very name; if it were on the written statute books it would be disfigured in a day.—Christian Science Monitor.

## Discussion For Next Session

Federal House To Debate On Question Of Titles For Canadians

Whether Canadians should be allowed to accept titles from the king, will be discussed by parliament when it comes next January. Humphrey Mitchell, Labor member for Hamilton east, is expected to start a full-fledged debate by introducing a resolution to continue the title-laws with the exception of judges, military and naval officers.

Premier R. B. Bennett, shortly before the close of the last session, announced the government did not consider itself bound by the Nickle anti-titles motion passed in 1919.

## Lancashire Woman Who Claims Relationship With Edison Has Some Remarkable Inventions

Following in the footsteps of Edison, the world-famous inventor, whom she claims as a remote relative, a Lancashire woman has to her credit a number of remarkable inventions.

Under her maiden name of Nell Bradshaw she has patented some extraordinary devices.

In the drawing-room of her home at Heaton Chapel, near Manchester, Miss Bradshaw has her newest inventions set out on the carpet, and even on the piano stool.

Her four latest and most important inventions are a lamp for penetrating fog at sea or on land; an improved radio-signalling apparatus; an anti-drowning life-jacket; and a thief alarm for unattended motor cars.

With the curtains of the drawing-room closed, Miss Bradshaw demonstrated the capabilities of her lamp for penetrating fog or darkness.

The lamp was built externally of copper, and with a series of lenses inside the "bull's-eye."

Miss Bradshaw switched on the light and directed it to the farthest corner of the room.

It was under the effect that a pin head on the wall could be seen quite plainly at a distance of 15 feet.

She then showed the effect that the current was taken from one of the ordinary wall sockets.

"By using a more powerful lamp at 'sea,' dotted with a red glow, it would be possible to dispel fog for a distance of at least five ship-lengths."

"That distance could be increased by building the entire lamp on a large scale."

"It has been tested on the road by the Stockport police and two of the principal bus companies operating in the North, and the Ministry of Transport has taken an interest in it."

Miss Bradshaw then showed her life-jacket, which is made of rubber and is fitted with four pockets.

"It is intended for use by life-guarders at seaside places, and by shipwrecked seamen and fishermen, who are forced to come down on the water."

By inflating a bag attached to the jacket it is always ready for an emergency.

"It worn like a short water-proof, but as soon as the wearer gets into the water the lower edges spread out like a rubber disc and float."

This keeps the upper part of the body erect and clear of the water entirely, and Miss Bradshaw claims that a non-swimmer could paddle about the water for days if necessary.

One of the pockets is fitted with a bulb of air, transmitting not only a S.O.S. can be sent out.

Another pocket contains a compass, and the rubber disc has a fourth pocket is packed with foodstuffs.

Miss Bradshaw further claims that she invented 12 years ago, a similar system of radio signals to that which is in use today.

"It was born in New York," she said, "and I came to England when it was quite young."

"I have always been interested in the question of life-saving, whether ashore or afloat, and nearly all my ideas have that object behind them. Financial gain never concerns me."

According to the family history, I am remotely related, on my grandmother's side, to Edison."

**An Unusual Operation**  
Patient With Cancer Had Entire Lung Successfully Removed

A report on the successful removal of an entire lung from a patient by Dr. Evans A. Graham was made public by Dr. Morris Fishbein, director of the Journal of the American Medical Association.

In an article appearing in the journal, Dr. Graham and Dr. J. H. August, both of the Washington University School of Medicine at St. Louis, state: "It is apparently the first time in which the whole lung has been deliberately removed at one stage."

Cancer necessitated removal of the lung. The operation was performed last April 5, but no previous reports had been made public. The patient, a Pittsburgh physician, is reported fully recovered.

Dr. Singer had charge of the diagnostic end of the case.

**Misses Lost Found**  
"Aunt Mamie" Williams, Negro, who once tipped the scales at 778 pounds, has complained to the Sheriff's office at Jacksonville, Florida, that a tipuone neighbors had hit her with a 200 pounds. They have made her feel "poorly" and said, and she wants peace and quiet rest, that the lost poundage may be regained. She is forty-eight and works the garden in which much of her food is raised.

## Earth's Last Blind Spot

Admiral Byrd Seeking To Throw Light On Antarctica

Admiral Byrd is off. It is a long, lonely way to Antarctica, but Byrd is lightly beginning what is to him, something of a homing flight. The man who established "Little America" and lived there as long as Byrd did cannot but feel that he is setting forth for a strange land. Yet, it is a fact that the land toward which the admiral is voyaging is the blindest of all the blind spots of the earth's surface. It is, in truth, the only really blind spot left.

Surely there has never been an other explorer who has made his work so interesting to so many. He is the first to make Antarctic exploration a matter of common knowledge and a topic of household conversation. He is the first explorer whose expedition, before its starting, has been celebrated by a special postage stamp of the United States.

Thus, though rough on the light journey southward to the earth's most hostile limit, but there is more than romance. Antarctica is a mass of land comparable in area to the habitable continents. It is, therefore, vastly more important as a field for scientific exploration than the north polar regions, which are all water. Human beings cannot live on a frozen sea.

It is a land of great interest, but with the world's population ceaselessly increasing man cannot concede any less land to beyond his attainment. Not, probably, as a place of permanent human abode, but as a source of some of the mineral necessities of civilization.

Some day the southern oceans may come to be as well known and adequately mapped as the State of Rhode Island.—Cleveland Plain Dealer.

**The Empire State Building**  
Thousands Have Viewed New York From Observation Tower

The first week the Empire State Building, under construction, has received 31,000 people upward to see the view. Six months later attendance is expected to be 100,000 a week.

By infatigable work attached to the project it is always ready for an emergency.

"It was born like a short water-proof, but as soon as the wearer gets into the water the lower edges spread out like a rubber disc and float."

This keeps the upper part of the body erect and clear of the water entirely, and Miss Bradshaw claims that a non-swimmer could paddle about the water for days if necessary.

One of the pockets is fitted with a bulb of air, transmitting not only a S.O.S. can be sent out.

Another pocket contains a compass, and the rubber disc has a fourth pocket is packed with foodstuffs.

Miss Bradshaw further claims that she invented 12 years ago, a similar system of radio signals to that which is in use today.

"It was born in New York," she said, "and I came to England when it was quite young."

"I have always been interested in the question of life-saving, whether ashore or afloat, and nearly all my ideas have that object behind them. Financial gain never concerns me."

According to the family history, I am remotely related, on my grandmother's side, to Edison."

**Two Nations Spending Millions With Tokyo Cable To Be Built**

A huge cable to tie New York Times tells that Japan faces a budget deficit in the coming year of \$70,000,000. The deficit is based on Japan's army and navy next year \$25,000,000. Civilization history is a baffling thing.—Ottawa Journal.

And the country where the New York Times is published has budgeted for a deficit of \$300,000,000 in 1931 and next year's expenditures are exclusive of non-military items of \$560,000,000.—Toronto Star.

**Humor Goes To Frisco**  
The world's oldest flea has been discovered at Palm Beach, East Frisco. The venerable insect is 5,000 years old, according to scientific examination, and is housed in a place named, found recently on the B.H. Hill shore.

**Much More Important**  
Hill's opinion: neighbors had hit her with a 200 pounds. They have made her feel "poorly" and said, and she wants peace and quiet rest, that the lost poundage may be regained. She is forty-eight and works the garden in which much of her food is raised.

Mr. and Mrs. H. M. McNaughton and Mrs. T. J. Ramsay motored to Calgary on Tuesday.

The next meeting of the Literary and dramatic club will be held in the Carbon United Church on Friday, November 26th, at 8:30 p.m. The program will consist chiefly of a discussion on current events and it is to be hoped that all members will be present.

Mrs. R. J. Parlour of Calgary was guest at the home of Mr. and Mrs. F. Torrance for a few days last week.

The next meeting of the U.F.A. will be held at Carbon on Saturday, Dec. 2.

Ice making at the curling and skating rinks has been delayed by the warm weather and we need a little more and more weather before much progress can be made.

Commencing this week the Builders' Hardware will run a series of ads. suggestions for Christmas in the advertising columns of this paper. The first of the series contains hints for Mothers, and will be followed next week by suggestions for gifts for 'Dad' to Builders' Hardware request you to save these suggestions for future reference, and to "do your Christmas Shopping Early."

A post and how many party was held in town last Saturday night. It is said that the participants passed an enjoyable night of revelry.

Edna "Pop" Bell's show "Baby Vint" put on at Carbon last Saturday night, rightly received the support of the residents of town and district, a large crowd taking in the performance.

Mr. and Mrs. E. J. Martin and family have moved from Rosedale and taken up residence on the old Pope place recently vacated by the Evans family.

A crew is in town this week installing lightning rods on the local elevators.

**RETAIN THE**

*Natural Beauty*  
OF YOUR SKIN

with this marvelous  
**Olive Oil Face Powder**

Have you looked at your complexion lately? Really looked at it? Is it soft, smooth and clear? Or is it a little sallow, a little rough? Sun... wind... days spent in the open? They have the natural oil out of your skin. Give your face to become dry and old-looking. But your skin need not grow old. Outcosm Oil Olive Oil Face Powder studies from the most delicate complexion to remain soft, firm and youthful. This unusual powder sets the skin to do to keep your skin smooth and supple. Yet it is as dry and light as dust. Therefore, try this different face powder today. In 7 days you should find naturally with any complexion. The Good Housekeeping "Gold of Approval" is your guarantee of quality. Outcosm Oil Face Powder and other Olive Oil Beauty Products are sold by leading drug, department and chain stores at 3 bars, 25c, 50c and \$1.00. A tea, sale of work and home cooking will be held under the auspices of the Carbon W. A. of the Anglican Church, in the Farmers' Exchange hall on Saturday, Nov. 25, from 3 to 6 p.m.

Otto Gittel and Ed Shell have taken over a service station in Calgary and have moved to the city. They have both rented their farms. Chris. Dudgeon going on Otto's place, and Andrew Beyer renting Ed. Schell's farm.

A meeting of the teachers of the town and district will be held on Saturday afternoon, December 2nd, for the purpose of forming a District Teachers' Association. This organization will take in the districts of Carbon, Swallow, Arma, Holscher and Lethbridge and will be for the purpose of social and educational welfare.

During the week of Monday November 27th, to Friday, December 2nd, a crusade of revival and renewal will be held at all parts of the Anglican Diocese of Calgary, when the Bishops and eleven priests will hold services at 47 separate places, including Carbon. The services at Carbon will be taken by the Rev. W. Atwood, and are as follows:

Wednesday, Nov. 23th in the Anglican church. Service for women (all women are invited) at 2:30 p.m. Mission services (everyone invited) at 8 p.m.

Thursday, November 24th (St. Andrew's day) Holy Communion, 9 a.m.

**Alberta Poultry for the British Market**

A considerable quantity of Alberta poultry will be exported to the British market this fall. It is reported by the provincial poultry department. Supplies are now being gathered together for a shipment during the week of November 24, which it is hoped will amount to about eight carloads. The poultry is being obtained largely from Southern Alberta points and it is interesting to note will include a wide variety of breeds. Last year about one million pounds of Canadian poultry were exported to the British market, a quantity of which came from Alberta.

**Cleaning Up the Crows and Gophers**

School children and others over the province have been more active than ever this year in aiding the farmers to clean up such agricultural pests as crows, muskrats and gophers. The report of the annual competition for the

destruction of these pests has just been issued by the provincial game branch, showing the total cawed to be as follows: Crows and magpies 45,255 as compared with 42,614 last year; gophers 725,238 compared with 621,784 last year; and crows and magpies' eggs 291,499 compared with 132,773 last year. In the association competition the first prize was won by the Medicine Hat fish and game association, with the Red Deer fish and game association second.
